# Good Neighbour Co-operative Pricing Model

Developed in partnership with YNCU and Bullfrog Power, the Good Neighbour Co-operative Pricing Model encourages credit unions to decarbonize with renewable energy. As more credit unions join, all members enjoy further discounted pricing.

## Current members:

- YNCU's head office in Kitchener, Ontario is bullfrogpowered with 100% green electricity.
- Bullfrog Power's generators put 100% clean, pollution-free electricity onto the grid to match the amount of conventional power that YNCU uses at its head office.

To date, the members of the Good Neighbour Co-operative Pricing Model have collectively avoided over 438.5 tonnes of CO<sub>2</sub>e emissions.
